

LIMITED VESSEL WARRANTY

United Biologics Silicone Vessels are made to withstand prolonged, repeated service with proper handling, care, maintenance and storage.

Should your vessel model develop a leak or similar malfunction, you are asked to notify United Biologics for a Return Authorization. A thorough inspection of the damaged vessel will be conducted to determine the appropriate course of action. Upon reaching a conclusive determination of the type and cause of the reported malfunction, the Company retains the right to offer either repair or recommendation of a model replacement. It is the Company's sole discretion for determining any charges or discounts associated with either the repair of a vessel model or any replacement vessels, including the potential of a "no charge" repair or discounted replacement for up to 1 year from date of purchase, and a nominal charge thereafter.
